NIKSUN makes it to the Si100 List for the 7th time

Monmouth Junction, New Jersey, November 6, 2009 – NIKSUN®, a world leader in real-time enterprise network surveillance solutions is featured in the November 2009 issue of Silicon Valley's leading technology magazine, Silicon India, in the annual Si100 list for the seventh year in a row.

The Si100 List is an annual listing of the top 100 technology companies compiled by Silicon India from over the 3,000 nominated companies founded by Indians in the US. "The companies in this year's list display the characteristics of long-term visibility, sustained growth, business focus, profitability and customer and employee value-creation. They had passion, enthusiasm, optimism and the sheer will to succeed in an economy, which was going through one of its worst phase." said Harvi Sachar, Editor-in-Chief & CEO of Silicon India. "We congratulate the 100 finalists for achieving this vote of respect from industry leaders and wish each and every one of them a great future", he added.

"NIKSUN is honored and excited to have made it to the 2009 Si100 List as the NIKSUN team continues to execute well despite the tough economy and retains its record of being profitable and cash flow positive", said Dr. Parag Pruthi, CEO and Founder of NIKSUN. "This success is due to our partnership with customers. We are constantly working with our customers to understand not only their current but also their emerging needs to create solutions that address these emerging needs."

NIKSUN's solutions are currently deployed in thousands of networks around the world. At any given instance, for a single customer, petabytes (1000's of terabytes) of data moving at rates as high as 10Gbps is constantly being processed, analyzed, stored, aggregated, correlated and alarmed upon. NIKSUN makes the unknown known.
